leapclub

india's first (offline) club

only for women

we started leap.club in 2020 with 30 women and a bold mission -
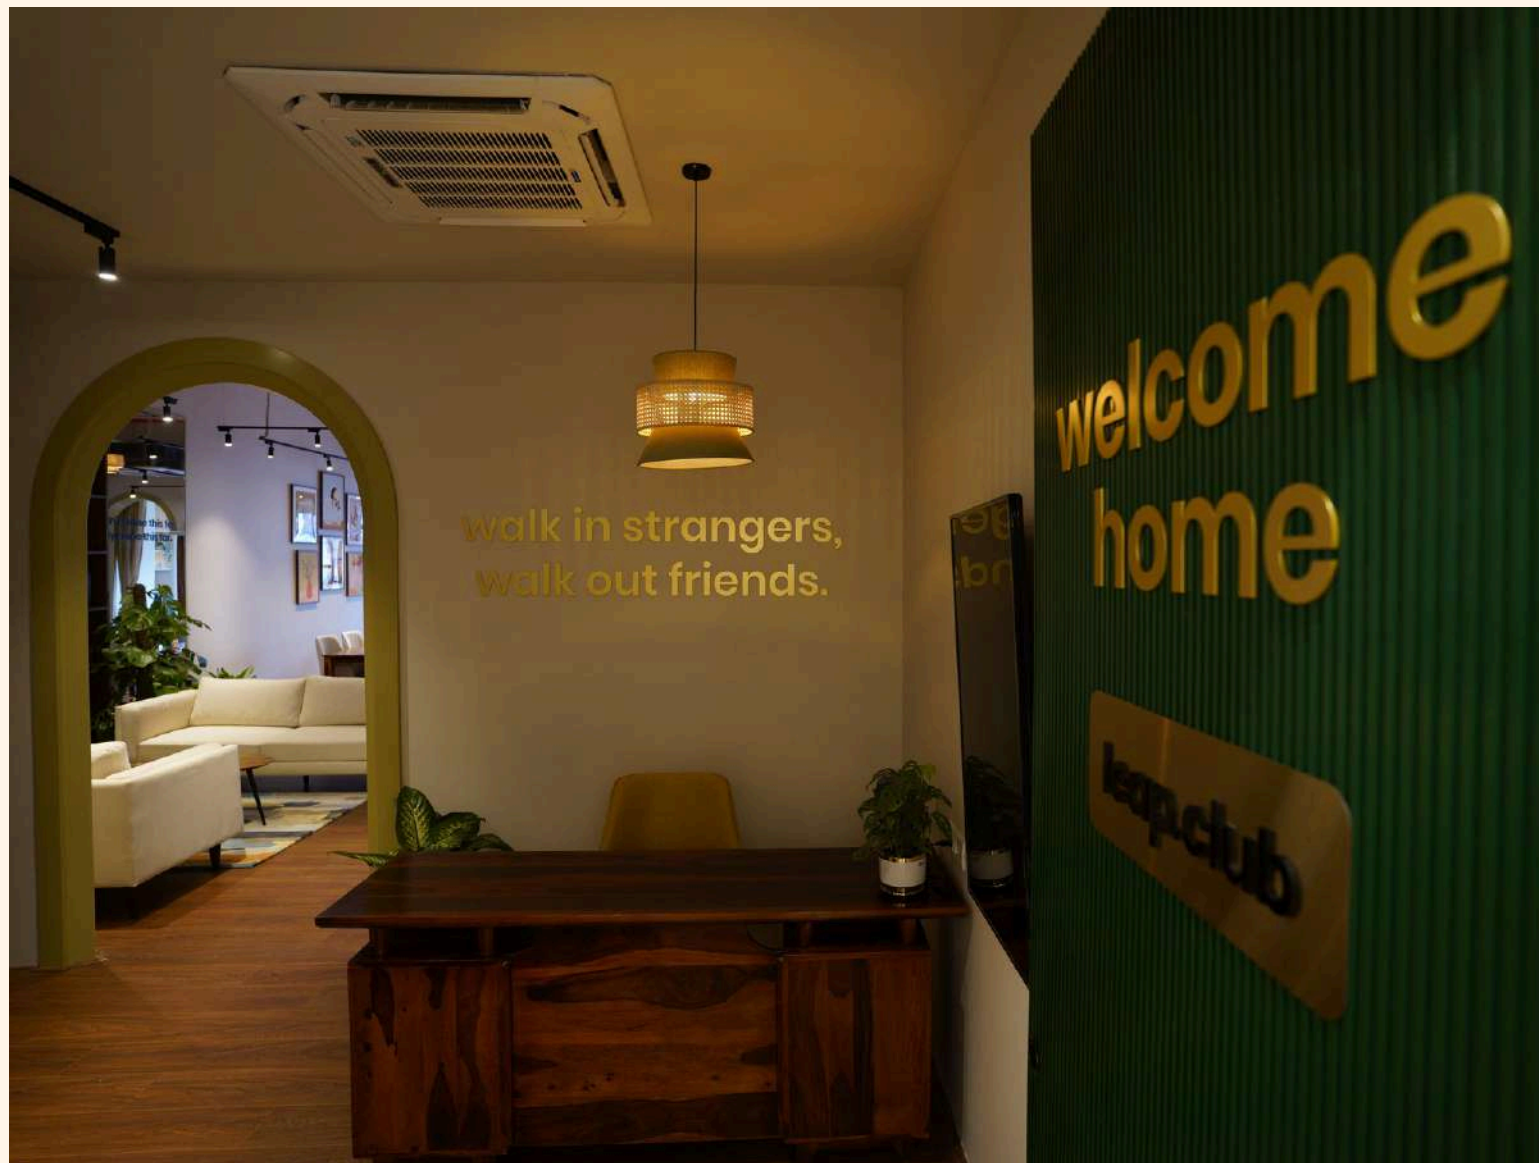

more women in leadership roles.

our goal was to build a new network focused on women - focussed on professional connections and new friendships.

in the last 4 years, 25,000 women have built professional connections, found new colleagues, jobs, clients, coaches, sports and travel buddies, and above all - made (lots of) new friends.

we have now launched

india's first offline club, only for women, at linking road in bombay.
